

Actuarial services to Life companies

A trusted advisor to the insurance sector

OAC has been a trusted advisor to the insurance sector for over 20 years. We ensure our clients feel supported at all times, and confident that they are receiving high quality, relevant advice from a team of dedicated and dependable actuarial professionals.

Actuarial consulting

It is a familiar problem. Your business must respond to continued operational and regulatory challenges and the actuarial team plays a key role in that process. However, there are times when you simply don't have enough, or the right expertise, to help you address the issues.

So what do you do? Do you turn to the 'large consultancies' for help and pay a premium price for their services? Or do you supplement your team with interim resource, which still leaves you with the challenge of managing the additional staff, allocating the work and checking the results? And that assumes you can find the right resource with the right skills at the right time.

There is another way!

OAC offers a fully managed actuarial consultancy service to provide you with the all-round support you need to get the job done – efficiently, reliably and responsibly.

At the heart of our business is a team of highly qualified and experienced professionals who have worked in some of the most challenging situations. OAC's actuarial consultants can be regularly found advising boards, liaising with the regulator, devising risk, capital and investment strategies, assessing risks, developing ORSA's, building models, designing and pricing products, submitting regulatory reports, analysing data – almost everything an actuarial team has to do on a daily basis.

So what makes us different?

We help you succeed by being flexible, responsive, and providing excellent value for money. We build long-term relationships with our clients, based on mutual trust and respect, so that we understand their business needs and can provide the right level of support just when it is needed. We would be delighted to introduce you to some of them so you can find out for yourself how much they value the actuarial work we do.

Whatever help you need from an actuary, just ask OAC.

Financial modelling

OAC's vision is to deliver a transformational improvement to the speed, scalability and reliability of the actuarial modelling process through the application of modern technologies so that insurance companies can become more responsive and cost-effective to business and regulatory change.

We do this by using our award-winning financial modelling solution, Mo.net, to develop and deploy the models required by our clients to support product development and pricing, financial and actuarial analysis, and regulatory and operational reporting.

Mo.net is a highly productive modelling platform which allows us and our clients to achieve more, more quickly and for less cost. Developed in conjunction with Software Alliance, an OAC joint venture company, Mo.net is already helping clients in the UK and around the world.
