

Governance, Risk & Compliance

Expertise when you need it

OAC is proud to be a trusted adviser to the insurance sector for over 20 years. We ensure our clients feel supported at all times, and confident that they are receiving high quality, relevant and timely advice from a team of dedicated and dependable experts.

OAC recognises that every firm has its own unique requirements for Governance, Risk and Compliance. These varying factors include differences in organisational structure, size, products and business objectives. OAC works with each of its clients to develop a service that is specific, proportionate and suitable for their needs.

Firms are faced with unrelenting growth of both new and existing regulation. Compliance departments are now responsible for the implementation of regulation that impacts on ever more areas of their business. Therefore, ensuring teams are kept up to date and have the necessary expertise when needed is paramount.

It is also important for firms to identify and understand all risks within their business, and develop systems of governance that monitor, manage and mitigate those risks and challenges.

Consultancy services

OAC is adept at undertaking a combination of services for clients, from one-off projects, audits, outsourced services to general consultancy. Clients are also kept up to date about new regulatory changes and initiatives through regular newsletters and articles containing our commentary, guidance and clarity on how those changes affect their businesses.

We specialise in the following areas:

- Interpretation and impact of new regulations and guidelines.
- Compliance review and audits.
- Systems and documentation of governance.
- Training and competence.
- Regulatory systems and controls.
- Mitigation of risk.
- Complaint handling and investigation.
- Financial promotions and documentation.
- Data protection.
- Business reviews.
- Telephone helpline facility for compliance teams.

Risk management solutions

We provide a suite of cloud-based risk management tools to help your firm embed effective risk management throughout your business. These include:

- TRACIO - To keep track of all your governance arrangements for senior managers and instantly generate Governance Maps.
- The Risk Database - To identify, mitigate, quantify and control all risks facing your business.
